

ACT REPORT

@WeRateDogs

By – Karandeep

Weratedogs is a Twitter page that regularly shares pictures and videos of dogs along with a humorous description and often a rating out of 10, for a dog in a picture, and mostly exceeds 10. Because all dogs are good boys. Created in November 2015, it became so popular and gained over 8 million followers instantly.

In this analysis, exploration for changes in the tweets, favourites, likes and predictions and ratings over time.

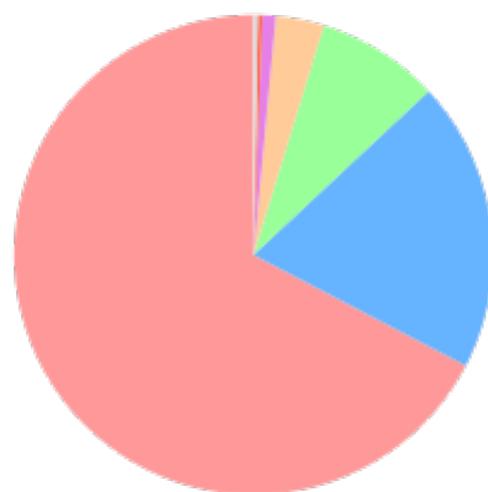

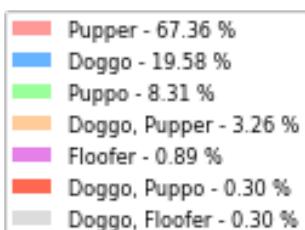

Questions answered from this analysis:

1. Who is the most common Dog?
2. Do retweets and favourites have relation of any kind?
3. What kind of device is used to post on twitter?
4. What is the relation among the variables?
5. Retweet and favourites relation over time?
6. Most common ratings?

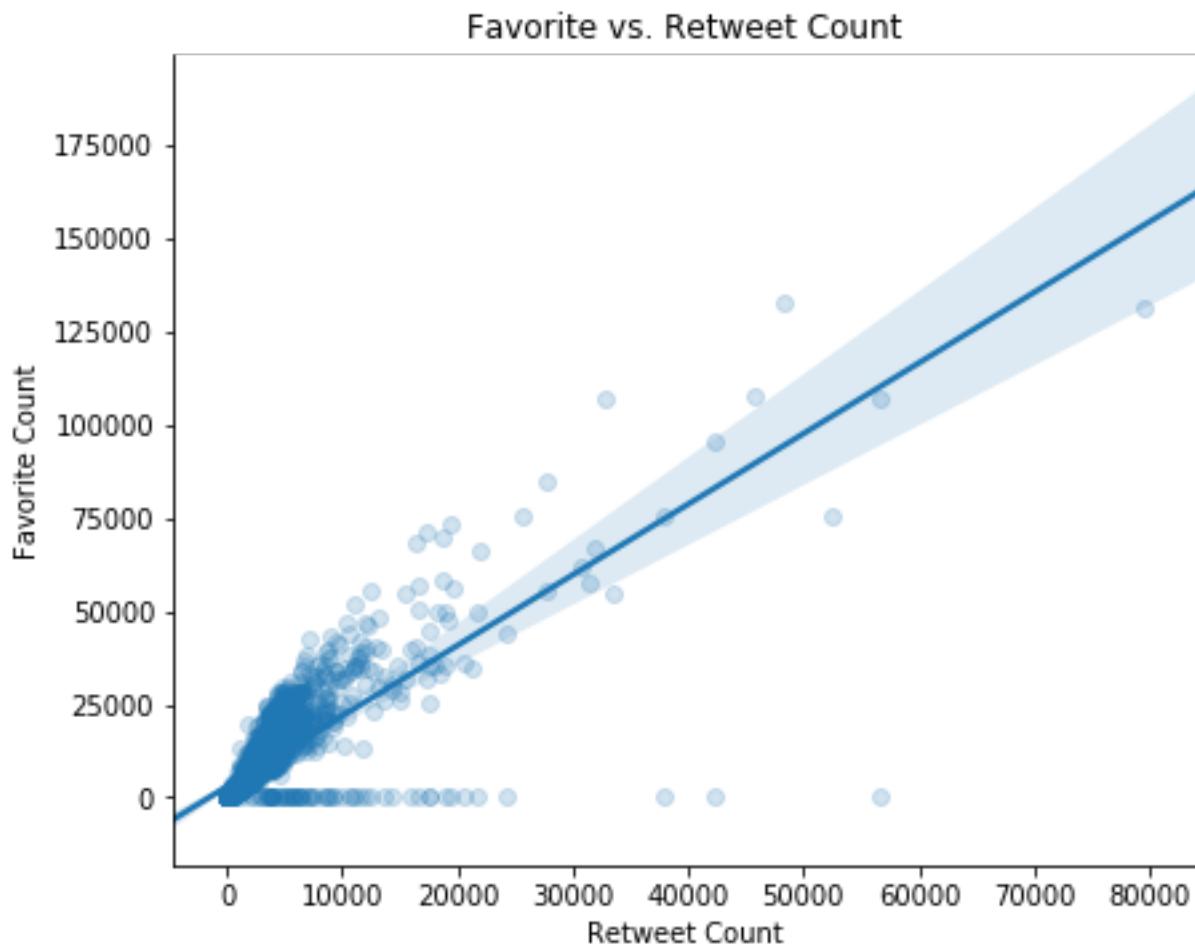

Who is the most common Dog?

Using the pie chart, it could be seen that there is a huge difference between the data.

- Floofer is the rarest and least common dog.
- Pupper is the most common dog.

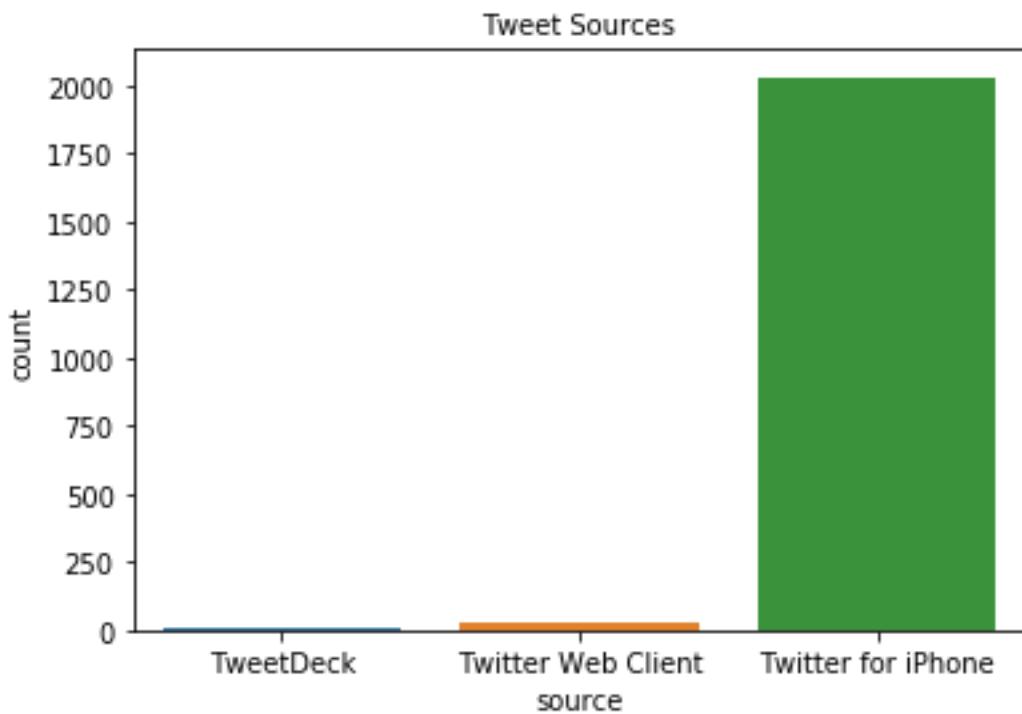

Do retweets and favourites have relation of any kind?

Clearly there is a positive correlation between retweets and favourites. So data suggests that increase in retweets increases the count of favourites.

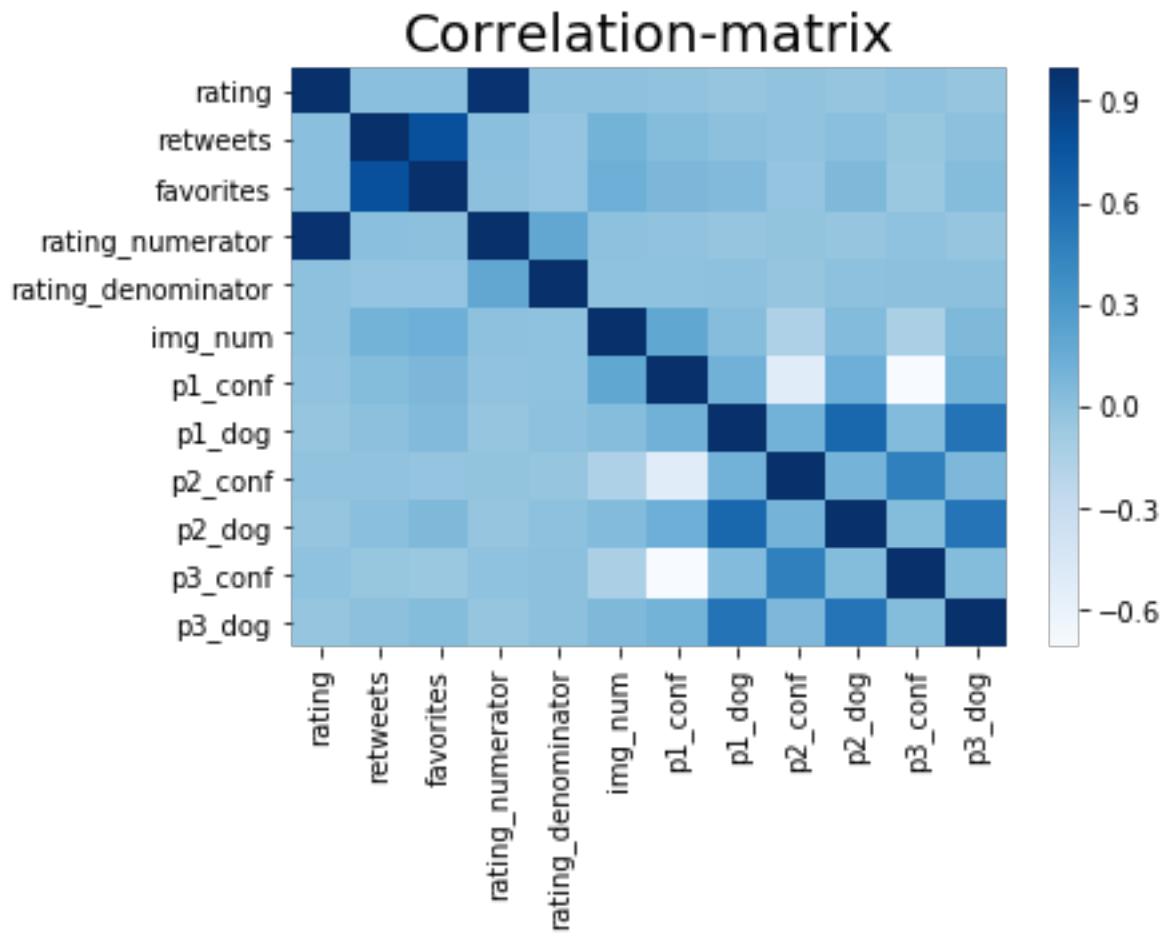

What kind device is used to post Tweet?

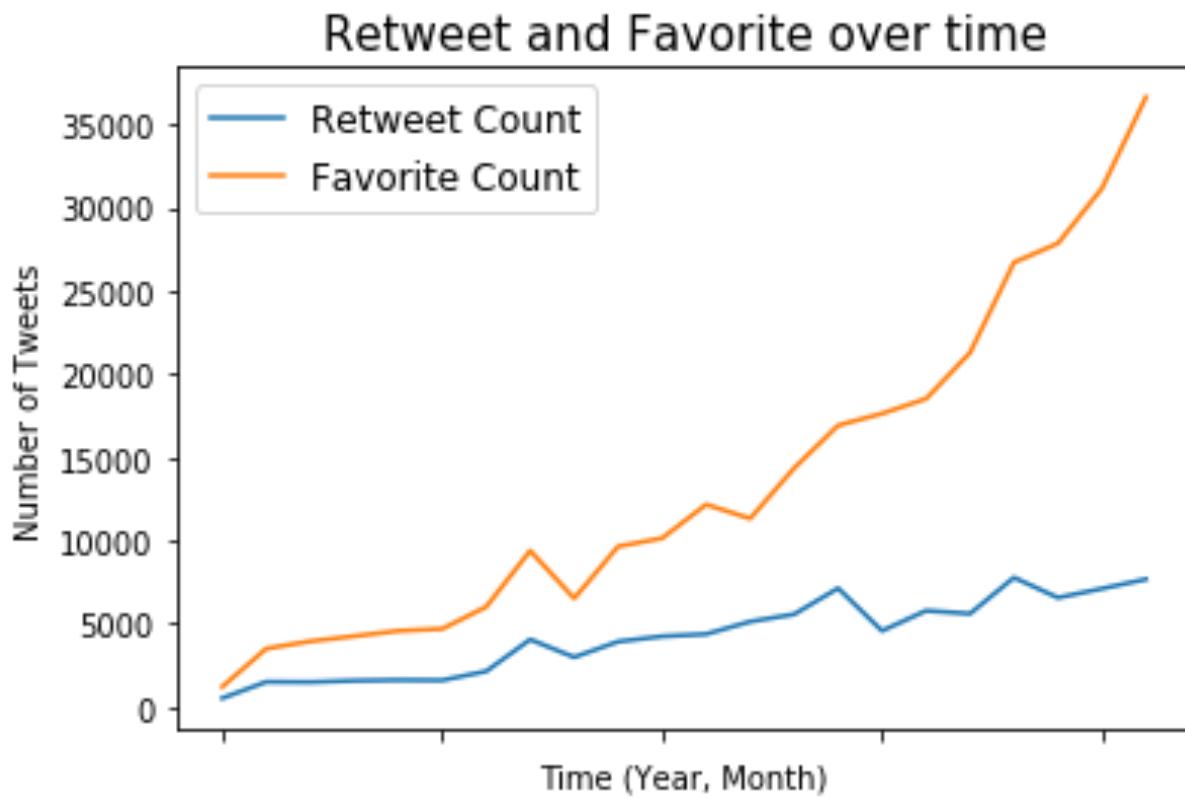

Clearly, the majority of users use iPhone to post tweets.
Apple is dominant company for twitter users.

Although there is no data about Android users, So I
assume among these three platforms iPhone is the most
used one.

What kind of relation is among variables?

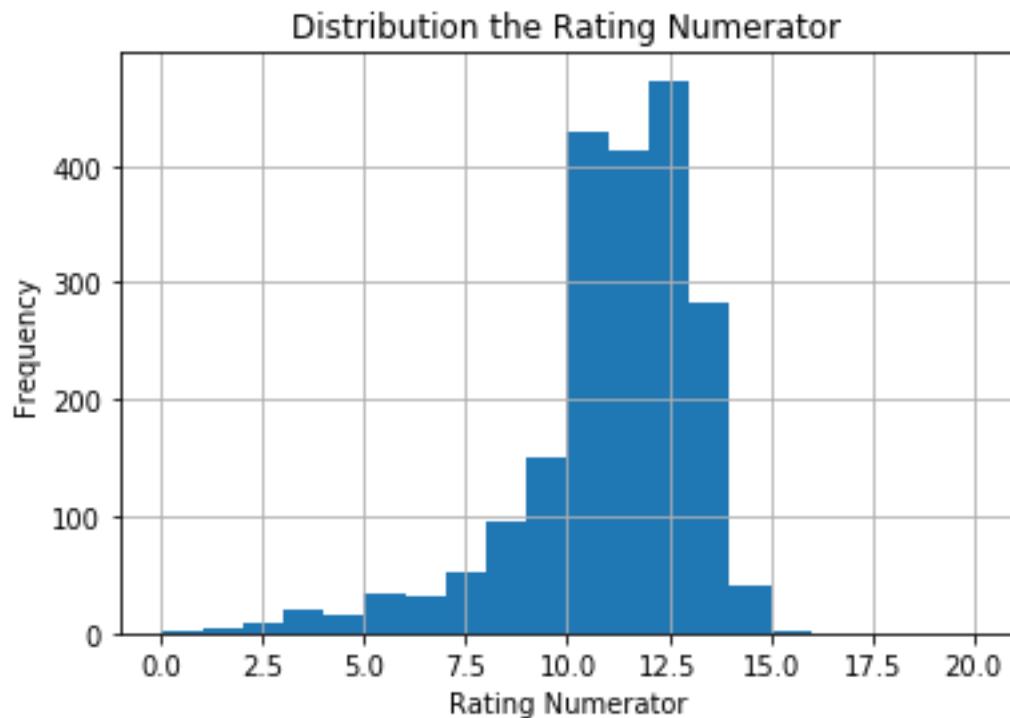

Retweets and Favourites relation over time?

Favourites are far more than retweets. Both, favorites and retweets, increased over the time. While the favorite count increases strongly with the number of tweets, the retweet count seems almost independent of the number of tweets.

Most common ratings?

Most ratings are integers that are 14 and below. Also, ratings above 20 are usually, given to images that contain more than one dog. So, 14 is the maximum rating considered in this plot. From the bar chart, it is shown that Most images are given a rating between 10 to 14.
